

Corporate Environment Policy

Corporate Environment Policy

SMEC is an international organisation specialising in consulting and project management.

SMEC's Policy is to be environmentally responsible, through a commitment to:

- Implementing and continually improving its project and office environmental management systems, conforming to the ISO 14001
- Complying with legal and other requirements applicable to SMEC
- Implementing environmental management programs to achieve environmental objectives and targets
- Conducting all activities in an environmentally responsible manner to minimise the potential for any SMEC activities or outputs to cause significant adverse environmental impacts
- Aiming for enhancement of beneficial environmental impacts of SMEC activities or outputs, to improve the quality of the environment we share with current and future generations
- Prevention of pollution associated with any SMEC activities
- Providing environmentally responsible, sustainable and practical options and solutions to clients
- Monitoring, reviews and audits of SMEC's environment performance.

SMEC Management is committed to being environmentally responsible in work SMEC undertakes by:

- Employing competent employees and ongoing education and training for existing employees
- Raising awareness of sustainable development principles on our projects, wherever possible
- Participating in relevant international conventions (e.g. UN Global Compact) and alignment with relevant international principles (e.g. The Equator Principles).
